

Broadcast Script: Let the People Know

This is not a protest. It's a public audit.

This is not rebellion. It's accountability.

The people have waited long enough. You were warned.

You robbed the pantry and blamed the hungry.

You offshored the jobs, laundered the truth, and turned justice into a costume.

You sold us \$35 glasses for \$500.

You handed out moldy drywall and poisoned pills.

You rigged the game — and then dared us to question the deck.

Well, we're done questioning.

We're counting.

We're auditing.

No more:

- Offshore accounts.
- Secret crypto deals.
- Foreign-owned contracts with zero oversight.
- Imported corruption disguised as commerce.

This isn't about party.

It's about parasites.

And the audit begins with you.

The people now demand:

- Open books on every government deal.
- Full transparency on tariffs, elections, lobbying, and surveillance.
- No more secret pipelines of power.

We are not afraid of you.

We're not here to riot.

We're here to repossess the truth.

The following documents are now in effect:

- The Oath of Accountability
- The Public Leadership Pledge
- The Candidate Scorecard
- The Message to Power

They are signed by those willing to serve — not rule.

To lead — not perform.

If you can't protect the elder, the child, the addict, the dissenter —

Step down.

You are no longer needed.

Let the people know.

The reckoning has arrived.
