

Global Audit Declaration

To all international watchdogs, transparency organizations, whistleblower networks, and global citizens:

We, the undersigned, declare that the systems of global governance — political, corporate, religious, and technological — have failed the public trust.

We are initiating a PEOPLE'S AUDIT.

This audit will target:

- Secretive financial institutions and offshore accounts
- Cryptocurrency holdings used for laundering or bribery
- Medical supply chains and pharmaceutical corruption
- International election manipulation and censorship
- Trade deals and tariff schemes lacking transparency
- Defense and surveillance contracts with no accountability

We do not recognize the immunity of those who govern without consent.

We do not accept elections run like stage plays or courts run like theaters.

We demand full access to the books — or the return of our sovereignty.

This declaration is not symbolic. It is procedural.

We are compiling data, tracking flows, exposing names, and publishing truth.

We call on international press, forensic auditors, and ethical leaders to join us.

The world stands at the edge of coordinated economic, social, and spiritual collapse.

This is not a conspiracy theory — it is a balance sheet.

And the numbers don't lie.

Let it be known:

The audit has begun. The records will be opened. The reckoning will be lawful.

If you are complicit, step down. If you are honest, step forward.

And if you are watching this silently, know this:

****Your silence is the final vote.****
